You've got a security strategy in place. But is it doing its job? Is bad stuff getting in? Getting out? Atlantic's Security Check Up can help answer those questions. And it's free!

Atlantic's Security Check Up is a passive service that involves deploying kit on a customer's network to observe traffic patterns and behavior to try and identify malicious or suspect activity.

What Does It Look For?

Our systems will be monitoring network traffic to identify risky or suspect applications, infected host bot and virus activity, worms, denial of service vulnerabilities, credit card info, file system privilege issues, data leakage – both in motion and at rest, as well as other potential issues.

How Does It Work?

We deploy two passive devices on your network. They will require basic connectivity as well as limited credentials to Active Directory. The devices operate for a defined period of time, ranging from a few hours up to 14 days. They are then removed from your network, a report is generated and the devices are erased and scrubbed.

What's In It For Atlantic?

The Security Check Up will demonstrate what our capabilities are and how we

operate. After the Check Up you are under no obligation to continue working with Atlantic, but we certainly hope our engagement demonstrates the value we bring to the table and how we can help.

What's My Risk?

All devices are passive. They will not act on or modify any traffic or issues they observe. Atlantic will hold any findings or issues in strictest confidence under a formal non-disclosure agreement.

What Else Can Atlantic Do For Me?

Armed with knowledge of your network and how your organization operates, we are then prepared to discuss how to help get your company to an *acceptable level of risk*. We can assist with improving your security posture, help deal with zero day and emerging threats, perform real time detection of known and unknown attacks, lock down sensitive data, etc.

If you'd like to talk about Atlantic's Security Check Up and how it may benefit your organization, contact your Atlantic representative.
